1. Michelle had a bag with 20 pieces of candy. She wanted to divide the candy equally between herself and her 4 brothers. What math sentence could she use to find out how many pieces to give to each person?

   ○ A. 20 ÷ 4 = 5
   ○ B. 20 ÷ 5 = 4
   ○ C. 20 − 4 = 16
   ○ D. 20 − 5 = 15

2. Tina has $30.00 to buy movie tickets for herself and her 2 friends. The tickets cost $8.00 each. Small sodas are $3.00 and a large popcorn is $4.50. If Tina buys the tickets and a large popcorn, how much money will she have left?

   ○ A. She doesn't have enough money to buy the tickets and popcorn.
   ○ B. $6.50
   ○ C. $1.50
   ○ D. $14.50
